Comments
good
Really nice instructor. Explains the material well. I'm only taking this class because it's required. The material is interesting, but I still have writing proofs.
Great lecturer, found the TA to be more useful in this course just as a different perspective that aligned with my understanding better. Great professor though, would recommend him to anyone.
N/A
Overall very difficult class. Not a big fan of the textbook not having many proofs to use as examples as it feels like every proof has to be done myself. Exams are hard but fair given the material.
Pretty good considering there were a lot of hard topics
I loved the way Dr. Ding taught, he was amazingly effective as a professor with his very intuitive explanations, and he was very organized as well. He made the proofs and the concepts easier to grasp. The homework felt like it was too much in the beginning, but Dr. Ding reduced the workload as the quarter progressed to where it felt like a good amount. I also appreciated the midterm and final practice problems, which I found helpful in my preparation.
Course is a bit mis-structured. But Professor Ding did a really good job teaching all the concepts.
I am very grateful of the extent to which the professor took the desires and opinions of the class into consideration, with regards to things like the difficulty of exams and amount of homework assigned.
humorous, kind, helpful, fair, good lectures, the best
Really nice professor, very understanding. teaches well even though it is a hard class.
Thank you for being such a great instructor for this really difficult class!
