Questions focused on Instructor

UCLA Department of Mathematics

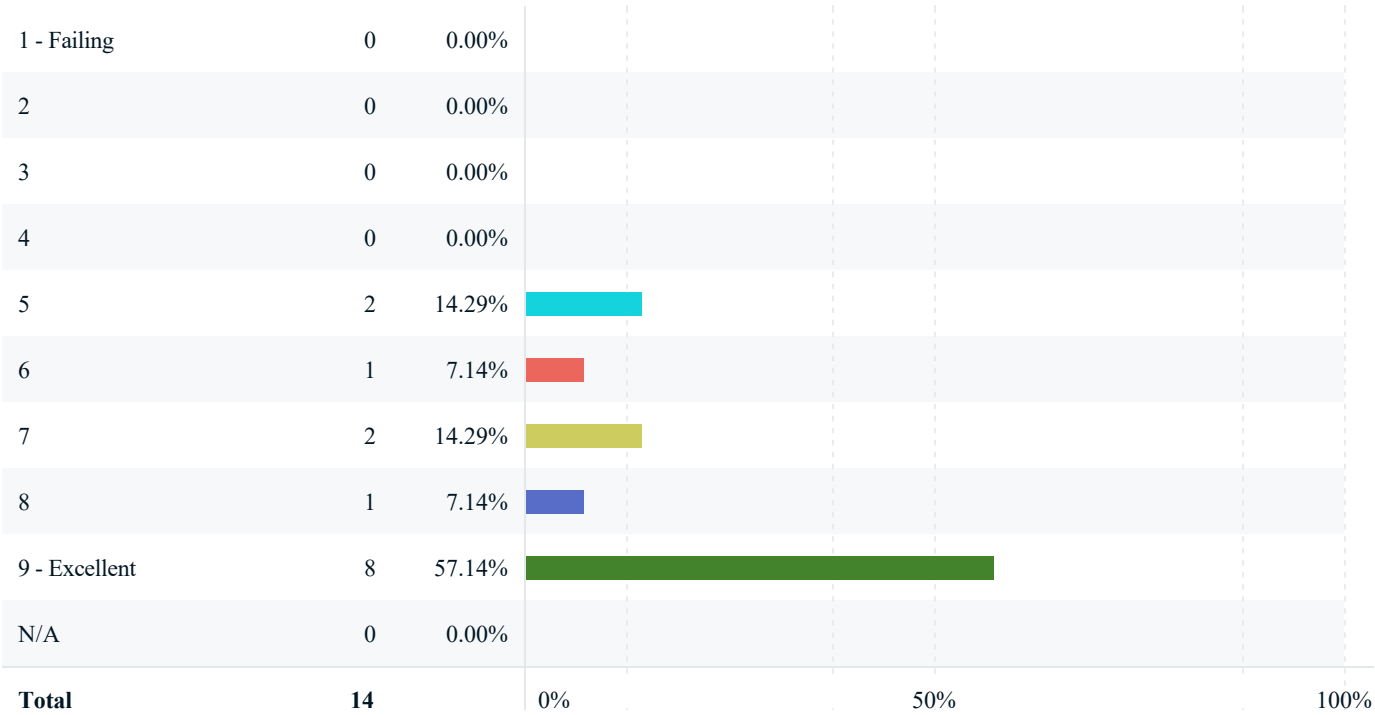

2. How would you rate the availability and helpfulness of your instructor outside of the classroom?

Statistics	Value
Invited Count	41
Response Count	14
Response Ratio	34.15%
Mean	8.54
Median	9.00
Mode	9
Standard Deviation	0.88

3. What is your rating of this course independent of the effectiveness of the instructor?

Statistics	Value
Invited Count	41
Response Count	14
Response Ratio	34.15%
Mean	7.86
Median	9.00
Mode	9
Standard Deviation	1.56

Comments
Helpful practice exams and exams. There seemed to be a slight disconnect between lecture and homework. I felt that homework was very challenging even when understanding concepts from lecture.
Amazing teaching. The most organized and thoughtful Professor I have had at this University. He was timely in uploading lecture notes and homework assignments, always came to class on time, always graded homework assignments within a week. On top of this, Professor Ding was an amazing lecturer, he was very good at breaking down tough concepts into digestible pieces of information. I wish I could have him for every math class at this University.
Would have liked it if the professor had split up his OH over the week. Otherwise, I thought he did a fantastic job. I think he did a really good job of explaining the material. The exams felt slightly long given the time constraint; maybe one less (sub) question would have been better. Grading was fair. Textbook was okay but sometimes had to follow.
Ding cares about his students. The practice exam and notes are all very helpful. Ding is really smart at explaining concepts. He makes the difficult math analysis course interesting and let students be willing to learn.
very good teaching, but please consider curving the overall grade rather than the individual exams!!!!!!!!!!!!!!
Hard content. Textbook was not as helpful as I imagined.
Professor did a great job explaining and exams were fair although grading was a bit harsh at times. Overall, recommend to all
Professor Ding's main priority was that we understood the content which was so helpful when studying for this course. I liked the structure of lecture, where he would explain more of the intuition and proofs behind the concepts, and the notes were posted after so I didn't have to worry so much about writing everything during lecture.
